

FIRST OBSERVATIONS WITH THE MWA

Miguel F. Morales¹ and for the MWA EoR Collaboration²

¹ University of Washington

² <http://www.mwatelescope.org>

I will present a first look at the initial 350 hours of MWA Epoch of Reionization observations. Particular emphasis will be given to the instrumental features of the MWA, data calibration, characterizing the foregrounds in the MWA EoR fields, and the expected science reach once the full 2013-2014 season is analyzed.
